

Princess Margaret Cancer Centre

ONE OF THE TOP 5 CANCER RESEARCH CENTRES IN THE WORLD

RESEARCH PERFORMANCE

Ranks 2nd for percentage of papers published in high-impact oncology journals, and 5th for percentage of highly cited papers¹

1 in 6 patients participating in a clinical trial

Canada's largest and one of the world's top-rated clinical trial programs

388,591 ft²
Research Space

10 floors at Princess Margaret Cancer Research Tower and 3 floors at Princess Margaret Cancer Centre are dedicated to research. This is larger than five soccer fields combined.

SCALE

17,797
new patients a year

World's largest single-site radiation medicine program with over 89,000 radiation visits per year

International partnerships with centres in Qatar, Italy, Jordan, India, Spain, China, Kenya, Ethiopia, Ghana and Germany

3,200 people in our research and clinical care enterprise, including²

857
Researchers and Research Staff

176
Oncologists

537
Nurses

446
Health Professions Staff

556
Clinical Trainees

BREADTH

200+ types of cancer treated including many of Canada's most complex and rare cases

One of the largest surgical oncology teams in the world with 72 surgeons

Canada's first centre to use genetic "fingerprints" to precisely diagnose patient cancers

A WORLD LEADER

Stem Cells in Cancer

Immunotherapy

Cancer Genomics, Epigenetics and Bioinformatics

Tumour Biology and Imaging

Bio Discovery and Drug Development

TRACK RECORD

WORLD FIRSTS

- Stem cells
- Cloning T-cell receptor
- Colon cancer stem cells
- Lung cancer gene signature
- New view on how blood is made
- Root cause of myeloma relapse
- Liquid biopsy biomarkers to identify aggressive prostate cancer

Dr. Tak Mak – SCIENTIFIC SUPER STAR

World-renowned pioneer in immunology research, cited over 99,000 times. Developed novel drugs including 2 currently in clinical trials for cancer.

Dr. David Jaffray – WORLD RENOWNED MEDICAL PHYSICIST AND INNOVATOR

World leader in image-guided radiation, with over 10 patents and 240+ peer-reviewed publications, EVP of Technology and Innovation at UHN and founding Director of Techna Institute.

Dr. Mary Gospodarowicz – WORLD RECOGNIZED ONCOLOGY LEADER

Medical Director, Princess Margaret Cancer Centre, globally recognized radiation oncologist, mentor and researcher, 250+ peer-reviewed publications, Officer of the Order of Canada 2015.

¹ Based on 2015-2017 data.

² Numbers reflect 2017 research and clinical care enterprise.
